

Public Notice to Boil Water

Due to the recent power outage and freezing temperatures the water system has fallen below normal pressure levels, the Texas Commission on Environmental Quality (TCEQ) has required our water system, Village of Surfside Beach, Texas PWS TX0200037 to notify customers of the need to boil their water prior to consumption. This is a precautionary measure until tests can be completed to determine water safety.

This boil water notice is in effect for ALL Residents. To ensure destruction of all harmful bacteria and other microbes, water for drinking, cooking, and making ice should be boiled and cooled prior to use. The water should be brought to a vigorous, rolling boil and then boiled for two minutes. In lieu of boiling, you may purchase bottled water or obtain water from some other suitable source.

When it is no longer necessary to boil the water, the water system officials will notify you that the water is safe for consumption. Instructions to discontinue boiling will be issued in the same manner as this notice.

If you have questions concerning this matter, you may contact public Tristan Butcher at City Hall at 979-233-1531. This notice is issued on February 18, 2021.
